**DETAILED ACTION**

***Election/Restrictions***

1. Applicant's election with traverse of Group I in the reply filed on 11/12/2007 is acknowledged.  
The traversal is on the ground(s) that by virtue of the dependency of the Group I claims, the scope of the latter is sufficiently broad to encompass the preparatory process defined by the former. This is found to be persuasive. Accordingly, restriction requirement is withdrawn.
2. Claims 1-12 are examined.
3. Claims 1-12 are allowed.
4. The following is an examiner's statement of reasons for allowance:
5. The claims are drawn to improved processes of making S-glyceraldehydes acetone by oxidation of threonic acid acetone which in turn is prepared by the oxidation the corresponding ascorbic acid acetone. The disclosed processes differ from the closest prior art found EP 143973. Though the starting materials and reagents used in both the cases are same, the reaction conditions disclosed in the instant case, albeit providing moderate improvement in yield of S-glyceraldehydes acetone, is amenable to large scale preparation as well as distinguished by the ease of operation. Additional improvement in the instant process is the use of enzymatic (Catalase) removal of excess oxidizing agent used in the formation of threonic acid acetone.
6. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
